1. The function  $g$  is given by  $g(x) = 4x^3 + 3x^2 - 6x + 1$ . What is the absolute minimum value of  $g$  on the closed interval  $[-2, 1]$ ?

(A)  $-7$ (B)  $-\frac{3}{4}$ (C)  $0$ (D)  $2$ (E)  $6$ 

2. Find the locations of the absolute extrema of  $h(x) = \frac{x^2}{x-1}$  on the closed interval  $\left[-1, \frac{1}{2}\right]$ .

1

1. The graphs of the derivatives of the functions  $f$ ,  $g$ , and  $h$  are shown above. Which of the functions  $f$ ,  $g$ , or  $h$  have a relative maximum on the open interval  $a < x < b$ ?

- (A)  $f$  only
- (B)  $g$  only
- (C)  $h$  only
- (D)  $f$  and  $g$  only
- (E)  $f$ ,  $g$ , and  $h$

Explain your reasoning.

**\*Teacher Note\***

**This is not a student facing notes page. Students should be using their Pre-AP Calculus notebook to capture their “I Do” and “We Do” Example**

**Example 1**

1. The figure above shows the graph of  $f'$ , the derivative of a function  $f$ . Identify:
  - a) The  $x$ -values at which  $f$  has a relative maximum.
  - b) The intervals on which  $f$  is concave down.
  - c) The  $x$ -values at which the graph of  $f$  has a point of inflection.
  - d) The intervals on which  $f$  is increasing.

**Problem Set A**

1. The graph of  $f'$ , the derivative of the function  $f$ , is shown to the right. On which of the following intervals is  $f$  decreasing?

- (A)  $[2, 4]$  only
- (B)  $[3, 5]$  only
- (C)  $[0, 1]$  and  $[3, 5]$
- (D)  $[2, 4]$  and  $[6, 7]$
- (E)  $[0, 2]$  and  $[4, 6]$

**Justify your answer:**

3

2. The figure to the right shows the graph of  $f'$ , the derivative of the function  $f$ , on the open interval  $-7 < x < 7$ . If  $f'$  has four zeros on  $-7 < x < 7$ , how many relative maxima does  $f$  have on  $-7 < x < 7$ ?

- (A) One
- (B) Two
- (C) Three
- (D) Four
- (E) Five

**Justify your answer:**

Example 2 – AP Multiple Choice!

1. The graph of  $f'$ , the derivative of the function  $f$ , is shown above. Which of the following statements must be true?
- I.  $f$  has a relative minimum at  $x = -3$ .
  - II. The graph of  $f$  has a point of inflection at  $x = -2$ .
  - III. The graph of  $f$  is concave down for  $0 < x < 4$ .
- (A) I only  
 (B) II only  
 (C) III only  
 (D) I and II only  
 (E) I and III only

**Problem Set B**

4

1. The graph of  $f'$ , the derivative of the function  $f$ , is shown in the figure above. Which of the following statements must be true?

- I.  $f$  is continuous on the open interval  $(a, b)$ .
- II.  $f$  is decreasing on the open interval  $(a, b)$ .
- III. The graph of  $f$  is concave down on the open interval  $(a, b)$ .

- (A) I only
- (B) I and II only
- (C) I and III only
- (D) II and III only

2. The graph of  $f'$ , the derivative of a function  $f$ , is shown to the right. The domain of  $f$  is the closed interval  $-2 \leq x \leq 5$ . Which of the following statements is true?

Graph of  $f'$

- (A)  $f(x)$  is decreasing over  $(2, 4)$ .
- (B)  $f(x)$  is increasing over  $(4, 5)$ .
- (C)  $f(x)$  is increasing over  $(1, 3)$ .
- (D)  $f(x)$  has a local maximum at  $x = 2$ .
- (E)  $f(x)$  has two local extrema on  $(-2, 5)$ .

Graph of  $f'$

3. The figure above shows the graph of  $f'$ , the derivative of the function  $f$ , for  $-6 < x < 8$ . Of the following, which best describes the graph of  $f$  on the same interval?

- (A) 1 relative minimum, 1 relative maximum, and 3 points of inflection
- (B) 1 relative minimum, 1 relative maximum, and 4 points of inflection
- (C) 2 relative minima, 1 relative maximum, and 2 points of inflection
- (D) 2 relative minima, 1 relative maximum, and 4 points of inflection
- (E) 2 relative minima, 2 relative maxima, and 3 points of inflection

4. The figure above shows the graph of  $f'$ , the derivative of the function  $f$ , on the interval  $[-3, 6]$ . If the derivative of the function  $h$  is given by  $h'(x) = 2f'(x)$ , how many points of inflection does the graph of  $h$  have on the interval  $[-3, 6]$ ?

- (A) One
- (B) Two
- (C) Three
- (D) Four
- (E) Five

5. The graph above is the graph of the derivative of a function  $f$ . Use the graph to answer each of the following questions about  $f$  on the interval  $(0, 10)$ . Justify each answer with 1 sentence.
- On what interval(s) is  $f$  increasing?
  - On what interval(s) is  $f$  decreasing?
  - On what interval(s) is  $f$  concave up?
  - On what interval(s) is  $f$  concave down?
  - Find the  $x$ -coordinates of all relative minima of  $f$ .
  - Find the  $x$ -coordinates of all relative maxima of  $f$ .
  - Find the  $x$ -coordinates of all points of inflection of  $f$ .
  - At what value(s) of  $x$  is  $f''(x)$  undefined?

Fast Workers! Nice Job working through Problem Set A and Problem Set B. Keep the math fresh by working through these spiral problems below.

**AP Open-Ended!**

- Each set of spiraled questions this week will be an actual AP open-ended problem from an old exam. Solve with a partner, then check with the scoring guide to see what score you achieved!

1. Let  $f$  be the function given by  $f(x) = x^3 - 5x^2 + 3x + k$ , where  $k$  is a constant.

a) On what intervals is  $f$  increasing?

b) On what intervals is the graph of  $f$  concave downward?

c) Find the value of  $k$  for which  $f$  has 11 as its relative minimum.

A. The graph of  $f'$ , the derivative of  $f$ , is shown in the figure above.

1. The function  $f$  has a local maximum at  $x =$

- (A)  $-3$
- (B)  $-1$
- (C)  $1$
- (D)  $3$
- (E)  $4$

2. How many points of inflection does the graph of  $f$  have?

- (A)  $0$
- (B)  $1$
- (C)  $2$
- (D)  $3$
- (E)  $4$

3. On what interval(s) is  $f$  both increasing and concave down? Justify your answer.

**10.07 – Homework**

**Binder Section: HW**

Part I: New Material – Analyzing the Graph of  $f'(x)$

1. The graph of  $f'$ , the derivative of  $f$ , is shown in the figure to the right. Which of the following describes all relative extrema of  $f$  on the open interval  $(a, b)$ ?

- (A) One relative maximum and two relative minima
- (B) Two relative maxima and one relative minimum
- (C) Three relative maxima and one relative minimum
- (D) One relative maximum and three relative minima
- (E) One relative maximum and one relative minimum

**Justify your answer.**

2. The function  $f$  is defined on the closed interval  $[0, 8]$ . The graph of its derivative  $f'$  is shown to the right. How many points of inflection does the graph of  $f$  have?

- (A) Two
- (B) Three
- (C) Four
- (D) Five
- (E) Six

**Justify your answer.**

3. The graph of  $f'(x)$ , the derivative of  $f(x)$ , is shown above. The domain of  $f$  is the interval  $-3 \leq x \leq 3$ . Which of the following is true about the graph of  $f$ ?

- I.  $f$  is increasing on  $(-3, -2)$ .
- II.  $f$  is concave down on  $(-3, -1)$ .
- III. The maximum value of  $f(x)$  on  $(-3, 2)$  is  $f(-3)$ .

- (A) I only
- (B) II only
- (C) III only
- (D) I and II only
- (E) II and III only

Part II: Spiral Material – keep the math fresh!

4. Let  $f$  be the function defined by  $f(x) = 2x^3 - 3x^2 - 12x + 18$ . On which of the following intervals is the graph of  $f$  both decreasing and concave up?

- (A)  $(-\infty, -1)$
- (B)  $(-1, \frac{1}{2})$
- (C)  $(-1, 2)$
- (D)  $(\frac{1}{2}, 2)$
- (E)  $(2, \infty)$
